Supplemental Funding in State Budget Passes

The General Assembly returned to Columbia on Tuesday and passed supplemental appropriations to the FY 2026-27 state budget. [H. 3305](#), as amended, includes community investment projects, commonly referred to as earmarks.

Under the agreement, the bill includes approximately \$131 million for Senate projects compared to \$220 million for House projects. To reduce the \$320 million in House projects initially proposed in the budget, leadership agreed to fully fund projects:

- relating to first responders or public safety
- \$300,000 or less in the House list

The remaining House projects over \$300,000 were reduced by approximately 39%, and all funding for non-profit organizations was removed.

View the complete [list of projects and funding levels adopted by the House and Senate](#).

The legislation will now head to Gov. Henry McMaster's desk.
